Hi Molly,

I'll take care of it today or by tomorrow morning.

Thank you,

Karen

Subject: FW: New SH Bell Data

Karen –

Is there a way we can get the new data posted the SH Bell website this week? I have not heard back from Yvette, so I imagine she is out of the office.

Thanks!

Subject: New SH Bell Data

Yvette –

We have new data to be posted to the SH Bell website. The FILTER air monitoring file is attached. You can change the months now to read “March – August 2017”. Can you please also update the text above the files for the monitoring data to remove the first paragraphs, and only keep the following? <https://www.epa.gov/il/sh-bell-chicago-air-monitoring-data>

Let me know if you have any questions.

Josh – FYI, the 6-month average is now 0.29 ug/m3.

Thanks.

LANGUAGE TO BE LEFT ON SITE:

EPA has developed various pollution and wind roses with the March 1, 2017, through June 30, 2017, air monitoring data. A wind rose is a diagram that shows the distribution of wind direction over a period of time. A pollution rose is a graphical display of wind direction frequency for winds having certain amounts of a particulates. For additional information on wind and pollution roses [see here](#).
